

MS POWERDRIVE PVT LTD

Perfect EDM Solution

ROBO - ZNC EDM MACHINE (Sparking Machine DSP Series)

Main Feature

- Attachment of Orbiting System. It can use Threading, Polishing & Undercut Process.
- NC Controlled Z-Axis feed.
- Compact design for small part machining.
- Rigid Machine base.
- Linear scales in all axes to ensure constant precision.
- Separate dielectric reservoir.
- Low-maintenance and high efficiency.
- DC Servo-drive for precise control and system stability.
- Anti-carbon automatically detection circuit.
- 10-Stage program to finish one time from rough to precise.
- Easy to learn operation.
- Direct parameter input and adjustment at the control panel.
- Translating between Chinese and English, Metric and Imperial.
- Machining parameters for specific operations can be stored.
- Fire prevention and liquid level control automatically.
- Different discharge system as optional.
- Conform to the CE safety standard of power box.

Specification:
